

Asperitas Global Top 50 Researchers

Raw Source Seed v1 - ranking metadata + 2 - 3 collection targets per researcher

Document Type	External benchmark / raw - source ingestion seed
Recommended Path	01_RAW_SOURCES/P6_EXTERNAL_BENCHMARK/global_researcher_rankings/
Primary Ranking Source	Research.com Best Scientists in the World 2025/2026
Evidence Status	Ranking metadata verified from Research.com; paper targets are candidate retrieval items requiring DOI/license verification before ingestion.
Generated	2026 - 06 - 28

Executive Bottom Line

이 PDF는 “ 원문 논문 전문 ” 이 아니라 Asperitas RAG/Knowledge Base의 raw - source 후보로 넣기 위한 메타데이터 seed이다. Research.com 상위 50명 랭킹을 기준으로 연구자별 2 - 3개 우선 수집 후보를 붙였다. 실제 RAG ingestion 전에는 DOI/PubMed/OpenAlex ID, 오픈액세스 여부, 라이선스, 재배포 가능 여부를 반드시 확인해야 한다.

Copyright / compliance note: full - text PDF bulk scraping is not included. Store metadata, abstracts, links, and open - access/full - license - approved files only. For closed - access papers, keep citation metadata and retrieval links, not copied full text.

Source & Method Notes

Type	Description	URL
Ranking source	Research.com Best Scientists in the World 2025/2026	https://research.com/scientists - rankings/best - scientists
Research.com methodology	Best Scientists methodology; D - index/H - index/citation basis	https://research.com/our - methodology
Bibliometric source family	OpenAlex - open scholarly knowledge graph	https://arxiv.org/abs/2205.01833
Cross - check source family	Elsevier/Stanford science - wide author database	https://elsevier.digitalcommonsdata.com/datasets/btchxktzyw
Retrieval source family	CrossRef search for DOI verification	https://search.crossref.org/
Biomedical retrieval	PubMed search for PMID/abstract verification	https://pubmed.ncbi.nlm.nih.gov/

Ingestion Schema Recommendation

researcher_rank, researcher_name, institution, h_index, citations, publications, field, source_candidate_title, retrieval_crossref_url, retrieval_pubmed_url, evidence_priority, verification_status, copyright_status, asperitas_relevance_tags

Top 50 Researcher Source Candidates

Evidence labels: ranking metadata = P6 external benchmark; scientific papers become P3 only after DOI/source verification. Verification status for all paper candidates: NEEDS DOI/LICENSE CHECK.

#1 Walter C. Willett - Nutrition / epidemiology

Institution: Harvard University, United States | H - index: 411 | Citations: 632,098 | Publications: 2,592 | Tags: nutrition, public health, cohort data, sustainability

Priority source targets:

1. Food in the Anthropocene: the EAT - Lancet Commission on healthy diets from sustainable food systems (verify: CrossRef / PubMed)
2. Diet, lifestyle, and the risk of type 2 diabetes mellitus in women (verify: CrossRef / PubMed)
3. Nutritional Epidemiology / food - frequency questionnaire validation studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#2 Ronald C. Kessler - Psychiatry / epidemiology

Institution: Harvard University, United States | H - index: 338 | Citations: 532,348 | Publications: 1,480 | Tags: population data, mental health, survey methods

Priority source targets:

1. Lifetime prevalence and age - of - onset distributions of DSM - IV disorders in the National Comorbidity Survey Replication (verify: CrossRef / PubMed)
2. The WHO World Mental Health Survey Initiative (verify: CrossRef / PubMed)
3. National Comorbidity Survey / NCS - R mental disorder prevalence studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#3 Eric S. Lander - Genomics / systems biology

Institution: Broad Institute, United States | H - index: 333 | Citations: 739,773 | Publications: 849 | Tags: genomics, genome - scale data, computational biology

Priority source targets:

1. Initial sequencing and analysis of the human genome (verify: CrossRef / PubMed)
2. Gene Set Enrichment Analysis: a knowledge - based approach for interpreting genome - wide expression profiles (verify: CrossRef / PubMed)
3. Human genome / GWAS interpretation and genome biology source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#4 Robert Langer - Biomedical engineering / drug delivery

Institution: MIT, United States | H - index: 333 | Citations: 451,612 | Publications: 2,475 | Tags: biomaterials, delivery, platform translation

Priority source targets:

1. Polymers for the sustained release of proteins and other macromolecules (verify: CrossRef / PubMed)
2. Tissue engineering (verify: CrossRef / PubMed)
3. Nanotechnology in drug delivery and biomaterials platform studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#5 Meir J. Stampfer - Epidemiology / public health

Institution: Harvard University, United States | H - index: 330 | Citations: 427,277 | Publications: 1,654 | Tags: cohort design, prevention, chronic disease

Priority source targets:

1. Primary prevention of coronary heart disease in women through diet and lifestyle (verify: CrossRef / PubMed)
2. Weight gain as a risk factor for clinical diabetes mellitus in women (verify: CrossRef / PubMed)
3. Postmenopausal hormone therapy and cardiovascular disease cohort studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#6 Albert Hofman - Epidemiology / neurology

Institution: Harvard University, United States | H - index: 324 | Citations: 466,575 | Publications: 2,694 | Tags: longitudinal cohorts, aging, dementia

Priority source targets:

1. The Rotterdam Study: objectives and design update (verify: CrossRef / PubMed)
2. Incidence of dementia and Alzheimer's disease in the Rotterdam Study (verify: CrossRef / PubMed)
3. Vascular risk factors, atherosclerosis, and dementia cohort studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#7 JoAnn E. Manson - Preventive medicine / clinical trials

Institution: Harvard Medical School, United States | H - index: 320 | Citations: 401,520 | Publications: 2,329 | Tags: clinical trials, prevention, women's health

Priority source targets:

1. Risks and benefits of estrogen plus progestin in healthy postmenopausal women: Women's Health Initiative randomized trial (verify: CrossRef / PubMed)
2. Vitamin D supplements and prevention of cancer and cardiovascular disease: VITAL trial (verify: CrossRef / PubMed)
3. Menopausal hormone therapy and health outcomes in WHI follow - up studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#8 Zhong Lin Wang - Nanotechnology / energy materials

Institution: Georgia Institute of Technology, United States | H - index: 318 | Citations: 432,011 | Publications: 2,718 | Tags: nanogenerator, materials, sensors

Priority source targets:

1. Piezoelectric nanogenerators based on zinc oxide nanowire arrays (verify: CrossRef / PubMed)
2. Triboelectric nanogenerators as new energy technology for self - powered systems (verify: CrossRef / PubMed)
3. Self - powered nanosystems and nanogenerator review papers (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#9 Frederick E. Shelton - Medical devices / surgical systems

Institution: Johnson & Johnson (United States), United States | H - index: 314 | Citations: 344,610 | Publications: 1,474 | Tags: medical devices, patents, regulated product design

Priority source targets:

1. Surgical stapling instrument and cartridge platform patent family (verify: CrossRef / PubMed)
2. Endoscopic surgical instrument with shaft articulation patent family (verify: CrossRef / PubMed)
3. Tissue thickness compensator / surgical fastener cartridge patent family (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#10 Graham A. Colditz - Cancer epidemiology

Institution: Washington University in St. Louis, United States | H - index: 312 | Citations: 379,301 | Publications: 1,804 | Tags: cancer prevention, cohort methods, risk modeling

Priority source targets:

1. Weight gain as a risk factor for clinical diabetes mellitus in women (verify: CrossRef / PubMed)
2. Validation of questionnaire information in prospective cohort studies (verify: CrossRef / PubMed)
3. Cancer prevention and population - attributable risk source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#11 Frank B. Hu - Nutrition / metabolic disease

Institution: Harvard University, United States | H - index: 309 | Citations: 405,205 | Publications: 1,869 | Tags: nutrition data, metabolic disease, prevention

Priority source targets:

1. Diet, lifestyle, and the risk of type 2 diabetes mellitus in women (verify: CrossRef / PubMed)
2. Sugar - sweetened beverages and risk of obesity and type 2 diabetes (verify: CrossRef / PubMed)
3. Healthy lifestyle and life expectancy / chronic disease prevention studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#12 Shizuo Akira - Immunology / innate immunity

Institution: Osaka University, Japan | H-index: 307 | Citations: 474,072 | Publications: 1,388 | Tags: immunology, TLR, host defense

Priority source targets:

1. Toll-like receptor signalling (verify: CrossRef / PubMed)
2. A Toll-like receptor recognizes bacterial DNA (verify: CrossRef / PubMed)
3. TLR4 and lipopolysaccharide recognition / MyD88 pathway studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open-access or license-cleared. Record DOI/OpenAlex/PMID before embedding.

#13 Guido Kroemer - Cell death / cancer biology

Institution: Université Paris Cité, France | H-index: 297 | Citations: 418,768 | Publications: 1,792 | Tags: cell death, autophagy, oncology

Priority source targets:

1. Classification of cell death: recommendations of the Nomenclature Committee on Cell Death (verify: CrossRef / PubMed)
2. Immunogenic cell death in cancer therapy (verify: CrossRef / PubMed)
3. Autophagy, apoptosis, and cellular stress-response studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open-access or license-cleared. Record DOI/OpenAlex/PMID before embedding.

#14 Michael Grätzel - Photovoltaics / materials chemistry

Institution: École Polytechnique Fédérale de Lausanne, Switzerland | H-index: 292 | Citations: 434,615 | Publications: 1,595 | Tags: energy materials, solar, commercialization

Priority source targets:

1. A low-cost, high-efficiency solar cell based on dye-sensitized colloidal TiO₂ films (verify: CrossRef / PubMed)
2. Photoelectrochemical cells (verify: CrossRef / PubMed)
3. Perovskite solar cell interface and mesoscopic solar cell studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open-access or license-cleared. Record DOI/OpenAlex/PMID before embedding.

#15 George Davey Smith - Genetic epidemiology

Institution: University of Bristol, United Kingdom | H-index: 291 | Citations: 438,019 | Publications: 3,058 | Tags: causal inference, MR, cohort genetics

Priority source targets:

1. Mendelian randomization: genetic anchors for causal inference in epidemiological studies (verify: CrossRef / PubMed)
2. Mendelian randomization: prospects, potentials, and limitations (verify: CrossRef / PubMed)
3. ALSPAC-linked causal inference and genetic epidemiology source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open-access or license-cleared. Record DOI/OpenAlex/PMID before embedding.

#16 George M. Whitesides - Chemistry / microfluidics / materials

Institution: Harvard University, United States | H-index: 291 | Citations: 386,553 | Publications: 1,828 | Tags: microfluidics, materials, lab-on-chip

Priority source targets:

1. Soft lithography (verify: CrossRef / PubMed)
2. Self-assembled monolayers of alkanethiolates on metals (verify: CrossRef / PubMed)
3. The origins and the future of microfluidics (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open-access or license-cleared. Record DOI/OpenAlex/PMID before embedding.

#17 Bert Vogelstein - Cancer genomics

Institution: Johns Hopkins University, United States | H-index: 290 | Citations: 495,255 | Publications: 871 | Tags: cancer genomics, mutation, diagnostics

Priority source targets:

1. Genetic alterations during colorectal-tumor development (verify: CrossRef / PubMed)
2. Cancer genome landscapes (verify: CrossRef / PubMed)
3. Digital PCR / tumor suppressor and oncogene source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open-access or license-cleared. Record DOI/OpenAlex/PMID before embedding.

#18 Gordon H. Guyatt - Evidence - based medicine

Institution: McMaster University, Canada | H - index: 290 | Citations: 366,582 | Publications: 1,715 | Tags: evidence grading, clinical decision, methodology

Priority source targets:

1. Evidence - based medicine: a new approach to teaching the practice of medicine (verify: CrossRef / PubMed)
2. GRADE guidelines series (verify: CrossRef / PubMed)
3. Users' Guides to the Medical Literature (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#19 Eugene Braunwald - Cardiology

Institution: Harvard Medical School, United States | H - index: 284 | Citations: 406,200 | Publications: 2,027 | Tags: cardiology, clinical trials, standard - of - care

Priority source targets:

1. Thrombolysis in Myocardial Infarction / TIMI clinical - trial source set (verify: CrossRef / PubMed)
2. Heart failure and myocardial infarction treatment studies (verify: CrossRef / PubMed)
3. Braunwald's Heart Disease reference source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#20 Solomon H. Snyder - Neuroscience / pharmacology

Institution: Johns Hopkins University School of Medicine, United States | H - index: 284 | Citations: 292,625 | Publications: 1,404 | Tags: receptor biology, neuroscience, signaling

Priority source targets:

1. Opiate receptor: demonstration in nervous tissue (verify: CrossRef / PubMed)
2. Nitric oxide as a neuronal messenger (verify: CrossRef / PubMed)
3. Neurotransmitter receptor biology and signal - transduction source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#21 Paul M. Ridker - Cardiovascular inflammation

Institution: Brigham and Women's Hospital, United States | H - index: 282 | Citations: 383,014 | Publications: 1,366 | Tags: inflammation, clinical trials, biomarkers

Priority source targets:

1. C - reactive protein and other markers of inflammation in prediction of cardiovascular disease (verify: CrossRef / PubMed)
2. JUPITER trial: rosuvastatin in primary prevention (verify: CrossRef / PubMed)
3. CANTOS trial: canakinumab and anti - inflammatory therapy (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#22 Salim Yusuf - Cardiovascular epidemiology

Institution: McMaster University, Canada | H - index: 280 | Citations: 385,992 | Publications: 1,611 | Tags: global health, trials, cohort data

Priority source targets:

1. INTERHEART study: effect of modifiable risk factors associated with myocardial infarction (verify: CrossRef / PubMed)
2. HOPE trial: ramipril and cardiovascular outcomes (verify: CrossRef / PubMed)
3. PURE study: global epidemiology of diet, risk, and mortality (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#23 Michael Karin - Inflammation / cancer biology

Institution: University of California, San Diego, United States | H - index: 279 | Citations: 348,118 | Publications: 834 | Tags: inflammation, NF - κ B, oncology

Priority source targets:

1. NF - κ B in cancer (verify: CrossRef / PubMed)
2. Inflammation and cancer (verify: CrossRef / PubMed)
3. IKK/JNK stress - signaling pathway studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#24 Karl J. Friston - Computational neuroscience

Institution: University College London, United Kingdom | H-index: 276 | Citations: 342,668 | Publications: 1,467 | Tags: modeling, inference, computational systems

Priority source targets:

1. Statistical parametric maps in functional imaging: a general linear approach (verify: CrossRef / PubMed)
2. Dynamic causal modelling (verify: CrossRef / PubMed)
3. The free - energy principle: a unified brain theory? (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#25 Richard A. Flavell - Immunology

Institution: Yale University, United States | H-index: 276 | Citations: 288,477 | Publications: 1,417 | Tags: immunology, models, cytokines

Priority source targets:

1. Inflammasome and innate immune - regulation studies (verify: CrossRef / PubMed)
2. T - cell differentiation / Th17 and immune tolerance source set (verify: CrossRef / PubMed)
3. Transgenic immune - model systems and cytokine signaling studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#26 Yi Cui - Energy materials / nanotechnology

Institution: Stanford University, United States | H-index: 272 | Citations: 299,036 | Publications: 1,087 | Tags: batteries, materials, scale - up

Priority source targets:

1. High - performance lithium battery anodes using silicon nanowires (verify: CrossRef / PubMed)
2. A reversible dendrite - free lithium metal anode (verify: CrossRef / PubMed)
3. Nanomaterials for energy conversion and storage source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#27 Nicholas J. Wareham - Metabolic epidemiology

Institution: University of Cambridge, United Kingdom | H-index: 271 | Citations: 308,031 | Publications: 1,786 | Tags: cohorts, metabolic disease, lifestyle data

Priority source targets:

1. EPIC - Norfolk cohort source set (verify: CrossRef / PubMed)
2. Physical activity, obesity, and type 2 diabetes risk studies (verify: CrossRef / PubMed)
3. Gene - lifestyle interaction studies in metabolic disease (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#28 Trevor W. Robbins - Cognitive neuroscience / psychology

Institution: University of Cambridge, United Kingdom | H-index: 269 | Citations: 237,030 | Publications: 1,330 | Tags: cognition, behavior assays, neuropsychology

Priority source targets:

1. CANTAB cognitive testing source set (verify: CrossRef / PubMed)
2. The 5 - choice serial reaction time task (verify: CrossRef / PubMed)
3. Frontostriatal circuits, impulsivity, and executive - function studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#29 Christopher J. L. Murray - Health metrics / global burden

Institution: University of Washington, United States | H-index: 262 | Citations: 558,203 | Publications: 814 | Tags: metrics, burden modeling, public health

Priority source targets:

1. Global Burden of Disease Study source set (verify: CrossRef / PubMed)
2. Disability - adjusted life years / DALY methodology papers (verify: CrossRef / PubMed)
3. Global health metrics and IHME comparative - risk studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#30 Jaakko Tuomilehto - Diabetes prevention / epidemiology

Institution: University of Helsinki, Finland | H - index: 262 | Citations: 345,597 | Publications: 1,738 | Tags: prevention, lifestyle intervention, cohorts

Priority source targets:

1. Prevention of type 2 diabetes mellitus by changes in lifestyle among subjects with impaired glucose tolerance (verify: CrossRef / PubMed)
2. Finnish Diabetes Prevention Study source set (verify: CrossRef / PubMed)
3. Hypertension, stroke, and diabetes cohort studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#31 Matthias Mann - Proteomics / mass spectrometry

Institution: Max Planck Institute of Biochemistry, Germany | H - index: 262 | Citations: 342,563 | Publications: 1,005 | Tags: proteomics, data pipelines, biomarkers

Priority source targets:

1. Stable isotope labeling by amino acids in cell culture (SILAC) source set (verify: CrossRef / PubMed)
2. MaxQuant computational proteomics platform papers (verify: CrossRef / PubMed)
3. Proteome - wide mass - spectrometry maps of human cells/tissues (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#32 Robert J. Lefkowitz - GPCR biology

Institution: Duke University, United States | H - index: 261 | Citations: 208,499 | Publications: 951 | Tags: GPCR, signal transduction, drug targets

Priority source targets:

1. Cloning of the mammalian beta - adrenergic receptor source set (verify: CrossRef / PubMed)
2. Seven - transmembrane receptor / GPCR signaling studies (verify: CrossRef / PubMed)
3. Beta - arrestin - mediated signaling and receptor regulation (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#33 Hagop M. Kantarjian - Leukemia / oncology trials

Institution: The University of Texas MD Anderson Cancer Center, United States | H - index: 260 | Citations: 320,383 | Publications: 4,557 | Tags: oncology trials, translational medicine, clinical protocols

Priority source targets:

1. Imatinib - era chronic myeloid leukemia therapy studies (verify: CrossRef / PubMed)
2. Adult acute lymphoblastic leukemia treatment protocols (verify: CrossRef / PubMed)
3. Blinatumomab, ponatinib, and leukemia clinical - trial source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#34 Kari Stefansson - Population genomics

Institution: deCODE Genetics (Iceland), Iceland | H - index: 260 | Citations: 274,167 | Publications: 1,014 | Tags: population genetics, biobank, variant discovery

Priority source targets:

1. Sequence variants from whole - genome sequencing of Icelanders (verify: CrossRef / PubMed)
2. Iceland population genomics and disease - associated variant source set (verify: CrossRef / PubMed)
3. Genome - wide association studies using founder - population data (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#35 Peter Libby - Atherosclerosis / inflammation

Institution: Brigham and Women's Hospital, United States | H - index: 259 | Citations: 297,643 | Publications: 1,087 | Tags: inflammation, vascular biology, biomarkers

Priority source targets:

1. Inflammation in atherosclerosis (verify: CrossRef / PubMed)
2. Atherosclerosis disease - mechanism review papers (verify: CrossRef / PubMed)
3. Plaque rupture and vascular - biology source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#36 Tim D. Spector - Twin studies / microbiome / nutrition

Institution: King's College London, United Kingdom | H - index: 257 | Citations: 262,707 | Publications: 1,757 | Tags: microbiome, cohort, personalized nutrition

Priority source targets:

1. TwinsUK cohort source set (verify: CrossRef / PubMed)
2. Gut microbiome diversity and metabolic health studies (verify: CrossRef / PubMed)
3. PREDICT personalized nutrition study source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#37 Steven A. Rosenberg - Cancer immunotherapy

Institution: National Institutes of Health, United States | H - index: 256 | Citations: 288,412 | Publications: 1,315 | Tags: cell therapy, immuno - oncology, translational biology

Priority source targets:

1. Use of tumor - infiltrating lymphocytes and interleukin - 2 in melanoma (verify: CrossRef / PubMed)
2. Adoptive cell transfer therapy for cancer (verify: CrossRef / PubMed)
3. Genetically modified T cells and TCR - based cancer immunotherapy (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#38 Luigi Ferrucci - Aging / gerontology

Institution: National Institutes of Health, United States | H - index: 255 | Citations: 288,583 | Publications: 1,836 | Tags: aging, biomarkers, cohorts

Priority source targets:

1. InCHIANTI study source set (verify: CrossRef / PubMed)
2. Frailty, inflammation, and aging biology studies (verify: CrossRef / PubMed)
3. Biomarkers of aging and longitudinal cohort source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#39 Peer Bork - Computational biology / microbiome

Institution: European Molecular Biology Laboratory, Germany | H - index: 254 | Citations: 407,395 | Publications: 789 | Tags: databases, microbiome, protein networks

Priority source targets:

1. STRING database: known and predicted protein - protein associations (verify: CrossRef / PubMed)
2. Enterotypes of the human gut microbiome (verify: CrossRef / PubMed)
3. Human gut microbial gene catalogue / metagenomics source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#40 Fred H. Gage - Neuroscience / stem cells

Institution: Salk Institute for Biological Studies, United States | H - index: 254 | Citations: 262,130 | Publications: 1,072 | Tags: stem cells, neurogenesis, disease models

Priority source targets:

1. Neurogenesis in the adult human hippocampus (verify: CrossRef / PubMed)
2. Adult neural stem cell and neural plasticity studies (verify: CrossRef / PubMed)
3. Induced pluripotent stem cells for neurological disease modeling (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#41 Daniel Levy - Cardiovascular genetics

Institution: National Institutes of Health, United States | H - index: 253 | Citations: 307,852 | Publications: 1,157 | Tags: cardiovascular genetics, cohort data, GWAS

Priority source targets:

1. Framingham Heart Study genetics source set (verify: CrossRef / PubMed)
2. Genome - wide association study for blood pressure (verify: CrossRef / PubMed)
3. Cardiovascular risk prediction and biomarker studies (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#42 Rob Knight - Microbiome / computational biology

Institution: University of California, San Diego, United States | H - index: 252 | Citations: 420,018 | Publications: 1,133 | Tags: microbiome, bioinformatics, community data

Priority source targets:

1. UniFrac: a new phylogenetic method for comparing microbial communities (verify: CrossRef / PubMed)
2. Earth Microbiome Project source set (verify: CrossRef / PubMed)
3. American Gut Project source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#43 Cyrus Cooper - Osteoporosis / epidemiology

Institution: University of Southampton, United Kingdom | H - index: 252 | Citations: 346,005 | Publications: 2,776 | Tags: bone health, epidemiology, risk models

Priority source targets:

1. Epidemiology of osteoporosis source set (verify: CrossRef / PubMed)
2. Developmental origins of osteoporotic fracture studies (verify: CrossRef / PubMed)
3. FRAX/fracture - risk and bone - health cohort source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#44 Kenneth W. Kinzler - Cancer genetics

Institution: Johns Hopkins University, United States | H - index: 250 | Citations: 350,417 | Publications: 676 | Tags: cancer genetics, diagnostics, tumor suppressors

Priority source targets:

1. Identification of APC/FAP colorectal cancer gene source set (verify: CrossRef / PubMed)
2. Colorectal tumor suppressor pathway studies (verify: CrossRef / PubMed)
3. Cancer genome landscapes (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#45 Younan Xia - Nanomaterials / chemistry

Institution: Johns Hopkins University, United States | H - index: 249 | Citations: 253,013 | Publications: 1,057 | Tags: nanomaterials, fabrication, sensors

Priority source targets:

1. Shape - controlled synthesis of metal nanocrystals (verify: CrossRef / PubMed)
2. One - dimensional nanostructures: synthesis, characterization, and applications (verify: CrossRef / PubMed)
3. Electrospinning of nanofibers and nanomaterial fabrication source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#46 Eugene V. Koonin - Evolutionary genomics / computational biology

Institution: National Institutes of Health, United States | H - index: 248 | Citations: 268,885 | Publications: 1,257 | Tags: comparative genomics, CRISPR, databases

Priority source targets:

1. Clusters of Orthologous Groups of proteins database papers (verify: CrossRef / PubMed)
2. Evolution and classification of CRISPR - Cas systems (verify: CrossRef / PubMed)
3. Comparative genomics of viruses and cellular life (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#47 Mark J. Daly - Human genetics / population variation

Institution: Massachusetts General Hospital, United States | H - index: 247 | Citations: 447,258 | Publications: 894 | Tags: GWAS, human genetics, reference datasets

Priority source targets:

1. Crohn's disease genome - wide association study source set (verify: CrossRef / PubMed)
2. Psychiatric Genomics Consortium source set (verify: CrossRef / PubMed)
3. gnomAD / human population variation source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#48 Mark P. Mattson - Neuroscience / metabolism

Institution: Johns Hopkins University, United States | H-index: 247 | Citations: 220,130 | Publications: 1,218 | Tags: metabolism, neuroprotection, aging

Priority source targets:

1. Intermittent fasting and brain health source set (verify: CrossRef / PubMed)
2. Hormesis, oxidative stress, and neurodegeneration studies (verify: CrossRef / PubMed)
3. BDNF, neuronal plasticity, and aging source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#49 Carlo M. Croce - Cancer genetics / microRNA

Institution: The Ohio State University, United States | H-index: 246 | Citations: 279,778 | Publications: 1,623 | Tags: microRNA, cancer genetics, oncology

Priority source targets:

1. Frequent deletions and down - regulation of microRNA genes miR - 15 and miR - 16 at 13q14 in chronic lymphocytic leukemia (verify: CrossRef / PubMed)
2. MicroRNAs in human cancer (verify: CrossRef / PubMed)
3. BCL2 translocations and lymphoma/cancer genetics source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

#50 Eric J. Topol - Digital medicine / genomics / AI medicine

Institution: Scripps Research Institute, United States | H-index: 245 | Citations: 242,001 | Publications: 1,609 | Tags: AI medicine, digital health, genomics

Priority source targets:

1. High - performance medicine: the convergence of human and artificial intelligence (verify: CrossRef / PubMed)
2. Individualized medicine from prewomb to tomb (verify: CrossRef / PubMed)
3. Digital medicine, genomic medicine, and AI - enabled healthcare source set (verify: CrossRef / PubMed)

Ingestion note: store metadata first; attach full text only if open - access or license - cleared. Record DOI/OpenAlex/PMID before embedding.

Raw Source Intake Checklist

1. Confirm researcher identity and disambiguation in OpenAlex / ORCID / institutional profile.
2. Resolve each candidate to DOI, PMID, PMCID, OpenAlex Work ID, or official publisher URL.
3. Classify access: open - access full text / abstract - only / closed access / patent / book / dataset / software.
4. Do not ingest copyrighted full text unless license - cleared. Prefer abstracts, metadata, OA PDFs, author manuscripts, datasets, code, and official protocols.
5. Chunk by research question, method, result, limitation, dataset, experimental design, and relevance to Asperitas.
6. Add source_priority: P3 for peer - reviewed science after verification; P6 for ranking/benchmark pages; P4 for government/institutional records.
7. Add verification_status: unverified, metadata_verified, full_text_verified, license_checked, embedded, eval_passed.
8. Run retrieval eval after ingestion using golden questions: researcher identity, paper claim, method, result, limitation, and citation correctness.

Recommended Placement & Registry Row Template

source_id: P6_GLOBAL_RESEARCHER_TOP50_RESEARCHCOM_2025_2026_v1 path: 01_RAW_SOURCES/P6_EXTERNAL_BENCHMARK/global_researcher_rankings/Asperitas_Global_Top50_Researchers_Raw_Source_Seed_v1.pdf source_type: external_benchmark / source_seed
priority: P6 for ranking; downstream paper records may become P3 after verification status: registered_only license_status:
metadata_seed_only; no full - text ingestion owner: Asperitas AI Manager / COO next_action: convert entries into CSV/JSONL, resolve
DOI/OpenAlex/PMID, run legal/license check, then ingest verified items.
