

# Asperitas Global Top 50 University Sources v1

QS World University Rankings 2027 basis - economic/business, technology, and company-useful source registry

|                  |                                                                                                                                                                             |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Purpose</b>   | Collect candidate open lectures, papers, research hubs, and commercialization resources from the global Top 50 universities for Asperitas learning, RAG, and strategy work. |
| <b>Scope</b>     | 50 universities x 3 categories: economic/business, technology, company-useful entrepreneurship/tech-transfer/commercialization resources.                                   |
| <b>Boundary</b>  | This PDF is a first-pass source registry. It is not a completed crawl, license approval, RAG ingestion, vector database, KG, or legal review.                               |
| <b>Next Gate</b> | URL verification -> Terms/license/robots review -> exact course/paper selection -> metadata tagging -> chunking -> retrieval eval -> RAG ingestion.                         |

Summary: 50 universities, 32 High-priority rows, 18 Medium-priority rows.

# Top 50 University Source Registry

Each university card preserves the economic/business, technology, and company-useful source candidates from the Excel registry. URLs are shown for auditability and manual verification.
