

Global VC Top 50 Training Brief

VC 별 선호 thesis / 좋아하는 회사 유형 / Asperitas 적용 신호

Prepared for Asperitas Inc. / GPT training source | 2026-06-28 KST

0. Executive Bottom Line

이 문서는 Dealroom 의 2026 Power Law Investor Ranking 공개 Top-50 VC 그래픽을 primary universe 로 사용하고, 각 VC 의 공식 홈페이지 · 공개 투자 thesis · 기관 ranking 자료를 보조 출처로 압축한 학습용 브리프다.

주의: 공개 그래픽은 Top-50 포함 여부를 보여주지만, 유료 데이터베이스 수준의 정확한 ordinal rank 전체를 기계 판독형으로 공개하지 않는다. 따라서 아래 1-50 은 '학습용 인덱스'이며, AUM · IRR · DPI · deal count 기준의 확정 순위가 아니다.

전 세계 상위 VC 의 공통 필터는 5 개다: 탁월한 창업자, 대형 시장, category-defining potential, proprietary data/technical moat, 초기 proof 에서 글로벌 scale 로 가는 credible path.

Asperitas 관점의 핵심 교훈: biodiversity access 자체는 VC thesis 가 아니다. VC 가 사고 싶은 것은 access -> proprietary biological data -> AI-bio model -> DBTL validation -> IP/compliance trust -> repeatable platform revenue 로 연결되는 compounding system 이다.

1. Methodology & Boundary

항목	처리 방식	사용 이유	한계
Primary universe	Dealroom 2026 Power Law Investor Ranking 공개 Top-50 VC graphic	power-law outcome 기반 VC universe 를 빠르게 고정	exact public rank order 전체는 별도 유료/원천 데이터 필요
Ranking calibration	TIME/Statista, PitchBook, CB Insights 자료로 ranking metric 차이 확인	VC 순위는 outcome, activity, AUM, exits 에 따라 달라짐	단일 절대 순위가 아님
Firm thesis	각 VC 공식 site 와 공개 profile 에서 강조 point 추출	투자자별 messaging 및 선호 회사 유형 파악	공식 문구는 marketing bias 존재
Asperitas signal	AI-bio/biological infrastructure 관점에서 fund-fit 해석	fundraising 전략 수립용	투자 가능성 보장 아님

2. Global VC Top 50 - Training Index

필드: VC / stage-region / 강조 point / 좋아하는 회사 유형 / Asperitas 적용 신호. 각 행은 공개 source 기반 요약이며, 확정 투자 의사 또는 내부 기준이 아니다.

#	VC	Stage / Region	강조 point	좋아하는 회사 유형	Asperitas signal
1	500 Global	US / global; pre-seed-Series A	전 세계 창업자, 빠른 성장, cross-border 확장, 생태계 네트워크.	글로벌 시장을 겨냥한 scalable tech, SaaS, fintech, marketplace, AI/consumer.	글로벌 생물자원 네트워크를 '국가별 공급사업'이 아니라 재현 가능한 global bio-data platform 으로 포장해야 함.
2	8VC	US; seed-growth / build	산업의 구조적 문제를 푸는 platform-scale technology, bio/health, logistics, defense, company	사회 · 경제적 가치가 큰 hard-industry platform, bio-sciences, AI/infra.	biofoundry + compliance + AI-bio infrastructure 논리가 가장 잘 맞음. 단, 실제 DBTL/검증 시스템이 필요.

			creation.		
3	Accel	US/EU/India; seed-growth	탁월한 창업자, category leader, early-to-IPO 장기 지원.	software, AI, SaaS, consumer, fintech, security 등 대형 시장 tech 기업.	합성생물학 R&D 보다 software/data wedge 와 반복 매출 proof 를 먼저 보여주는 것이 유리.
4	Andreessen Horowitz (a16z)	US/global; seed-growth	미래를 재구성하는 기술, AI infra, Bio+Health, enterprise, American Dynamism.	대규모 시장에서 기존 시스템을 재설계 하는 bold founder 와 infrastructure platform.	AI-bio + national biosecurity + biotech infrastructure 스토리가 fit. 과학 검증과 규제 gate 가 약하면 즉시 탈락.
5	Bain Capital Ventures	US; seed-growth	domain-focused investing: AI apps/infra, fintech, healthcare, security, industrials. idea incubation 부터 growth 까지.	B2B software, AI infrastructure, healthcare/industrial software with commercial pull.	wet-lab 회사가 아니라 biology data/workflow software 회사로 초기 제품을 좁히면 접근 가능.
6	Bessemer Venture Partners	US/global; seed-growth	thesis-driven long-term company building, cloud/SaaS roadmaps, founder partnership.	cloud, SaaS, fintech, healthcare, developer/platform companies with durable market category.	'biodiversity-to-bioeconomy roadmap'처럼 명확한 category thesis 와 revenue path 가 있어야 함.
7	Benchmark	US; seed/Series A	concentrated early conviction, equal partnership, hands-on board engagement.	아주 초기지만 PMF 잠재력이 뚜렷한 iconic tech companies.	초기 접근은 어렵다. 단일 wedge, 창업자 역량, 거대한 시장 논리가 극도로 선명해야 함.
8	BoxGroup	US; pre-seed/seed	earliest-stage, vision/raw product, founder-first tech investing.	시작 단계의 bold tech founders, consumer/enterprise/fintech/AI/ marketplace.	heavy bio capex 보다 빠르게 데모 가능한 software/data wedge 가 있어야 함.
9	Coatue	US/global; growth/crossover + early	public/private tech investing, AI innovation, macro + data-driven risk management.	AI, enterprise, fintech, consumer internet, scale-stage tech leaders.	현재보다는 후속 라운드 후보. compounding biological dataset + revenue velocity 가 확인되어야 함.
10	CRV	US; seed/Series A	early-stage discipline, technical founders, AI-native, cybersecurity, devtools, infra, SaaS.	기술창업자 중심의 software infra, AI-native B2B, developer/platform products.	AI-bio developer tool, bio-data API, compliance workflow platform 으로 좁히면 fit 상승.
11	DCVC	US; seed-growth deep tech	deep tech VC; AI 로 high-stakes hard problems 를 해결하는 창업자.	AI, compute, bio, climate, industrial, space, robotics 등 과학 기술 기반 giant-industry transformation.	Asperitas 와 매우 높은 fit. 핵심은 biodiversity access 를 검증된 proprietary data/experiment loop 로 전환하는 증거.
12	Felicitis	US; seed-growth	iconic founders, dreamers/outliers/builders, frontier tech 와 core market reinvention.	큰 시장을 새 방식으로 재창조하는 brave founders.	audacious platform narrative 가 능. 다만 milestone, proof, adoption plan 없으면 과장으로 보임.
13	First Round Capital	US; pre-seed/seed	company creation earliest stage, hands-on founder support, market-size thinking.	초기 founder-market fit, 빠른 학습 속도, 첫 institutional round 기업.	첫 제품은 아주 좁아야 함: 예컨대 bio-source compliance RAG 또는 DBTL planning tool.
14	FJ Labs	US/global; stage-agnostic	marketplaces and network effects; capital-efficient liquidity/platform models.	marketplace, logistics, commerce, fintech, network-effect businesses.	biological resource/data marketplace 가 credible 하면 fit. 순수 R&D narrative 에는 약함.
15	Founder Collective	US; seed	founder alignment, capital efficiency, earliest stages, long-term ownership.	효율적 자본 사용으로 durable company 를 만드는 seed founders.	non-dilutive grants, 초기 매출, low-burn 데이터 축적을 강조해야 함.
16	Founders Fund	US/global; all stages	contrarian big bets; smart people solving difficult problems; aerospace, defense, biotech, AI.	문명 규모의 hard problem 을 푸는 과학·공학 기반 회사.	'Biological Infrastructure' thesis 는 강함. 그러나 규제/과학/수익 모델 약점은 가장 공격적으로 검증될 것.
17	FundersClub	US; seed platform/syndicate	유망 스타트업을 발견·자금지원·지원하는 selective startup investment platform.	네트워크가 투자 가능한 high-conviction early startup opportunities.	간단하고 투자자 친화적 narrative, traction proof, syndicate-ready 자료가 필요.

18	General Catalyst	US/global; creation-seed-growth	investment + transformation company; resilience, responsible innovation, healthcare system transformation.	AI/service transformation, health assurance, enterprise modernization, applied infrastructure.	bio-compliance + AI decision infrastructure 로 포지셔닝하면 강함. 단, healthcare/enterprise buyer proof 필요.
19	Global Founders Capital (GFC)	Germany/global; early-growth	Rocket Internet lineage; global tech companies from day one, broad sector coverage.	globally scalable internet/software businesses and marketplaces.	국가별 생물 공급망이 아니라 글로벌 반복 확장 가능한 platform economics 를 보여줘야 함.
20	Goldman Sachs Growth	US/global; growth equity	fundamental diligence, market-changing leadership, institutional growth capital.	성장단계 tech/fintech/healthcare companies with robust financial metrics.	장기 후보. compliance, audit trail, revenue quality 가 institutional-grade 일 때 접근.
21	Great Oaks Venture Capital	US; pre-seed/seed/A	active seed investor; software, healthcare, financial services, marketplaces, enterprise.	초기 US tech founders with broad software/healthcare/fintech angle.	미국 법인/시장 진입과 초기 product wedge 가 명확할 때 소액 seed target.
22	Greylock	US; pre-idea/seed/A	AI-first, company building before PMF, software reshaping industries.	AI, cybersecurity, infra, SaaS, consumer, marketplaces, fintech, crypto.	Foundation Model for Biology 논리는 fit 가능. 하지만 '모델'보다 데이터/워크플로우/평가체계 실체가 중요.
23	GV	US/global; seed-growth	innovative founders, long-term relationship, life sciences, enterprise, consumer, frontier tech.	Alphabet-level support 를 활용할 수 있는 high-impact science/tech companies.	AI-bio/life sciences 측면에서 매우 좋은 fit. scientific validation pack 과 IP/data governance 가 핵심.
24	HongShan / HSG	China/global; VC/PE	formerly Sequoia China; tech, healthcare, consumer, China/global scaling.	China/Asia scale technology, healthcare, consumer platforms.	중국 확장/파트너십 후보. 단, IP, 데이터 주권, Nagoya/CITES/LMO 리스크 설계를 먼저 끝내야 함.
25	IDG Capital	China/global; early-growth	China/global network, technology, healthcare, consumer innovation.	tech, healthcare, consumer growth companies with China cross-border leverage.	중국·아시아 확장 후보. 바이오데이터/IP 통제와 regulatory story 가 선행되어야 함.
26	Index Ventures	US/EU/Israel; seed-IPO	exceptional entrepreneurs, bold ideas into global businesses, global expansion.	global software/tech companies with founder ambition and category potential.	Europe/US expansion, category naming, clean enterprise wedge 가 필요.
27	Initialized Capital	US; seed	0-to-1 founder support, grit, audacity, obsession, technical breadth.	SaaS, AI, infrastructure, health, hard tech, consumer, crypto seed founders.	founder-driven hard-tech narrative 는 fit. 초기 product velocity 를 구체화해야 함.
28	Insight Partners	US/global; scaleup/growth	global software investor; ScaleUp operating engine for high-growth software/internet companies.	software, internet, SaaS, data platforms with measurable growth.	나중 후보. biology platform 이 enterprise software/subscription/API 매출로 보일 때 적합.
29	Khosla Ventures	US; seed-growth	early, bold, impactful deep tech; AI, climate, health, enterprise/consumer.	breakthrough science/technology with world-scale impact and contrarian insight.	아주 높은 fit. proprietary biodiversity data + validated DBTL loop + large market wedge 가 필요.
30	Kima Ventures	France/global; pre-seed/seed	extreme velocity; small fast checks; any sector/stage if learning/execution curve is strong.	빠른 실행과 글로벌 야망을 가진 seed teams.	빠른 seed signal 용. 한 장짜리 traction, founder velocity, 다음 90 일 milestone 이 중요.
31	Kleiner Perkins	US; inception-IPO	bold ideas, category-defining companies across consumer, enterprise, health, fintech, hardtech.	역사적 category winner 가 될 수 있는 companies.	breakthrough evidence 와 massive category framing 이 있어야 함.
32	Lightspeed Venture Partners	US/global; seed-Series F	multi-stage, bold founders, enterprise/consumer/health/fintech, global platform.	AI, enterprise software, consumer, fintech, health companies with high-velocity adoption.	AI-bio platform + customer adoption proof 가 있으면 strong target.
33	Liquid 2 Ventures	US; pre-seed/seed	founder network, pre-seed/seed	software-first startups with	US early round signal 용. biology

			tech startups, hands-on guidance.	network/data defensibility.	story 를 software-like product and GTM 으로 변환해야 함.
34	Lux Capital	US; seed-growth frontier	science-fiction-to-science-fact; frontier tech, AI, robotics, aerospace, biotech, advanced manufacturing.	technical risk 가 높지만 world-changing potential 이 큰 scientific companies.	Asperitas 와 최상위 fit. scientific diligence pack, reproducibility plan, safety/compliance architecture 가 필수.
35	NEA	US/global; idea-IPO	enduring partnerships at every stage; technology and healthcare depth.	enterprise tech, AI, cybersecurity, fintech, life sciences, digital health.	AI/data product 와 life-science validation 을 동시에 보여주면 강함.
36	Phoenix Court / LocalGlobe	UK/EU; pre-seed-public	LocalGlobe/Latitude/Solar/ Basecamp lifecycle; UK/Europe ecosystem, New Palo Alto thesis.	European/UK science, software, climate, deep-tech founders across lifecycle.	영국/EU 확장 · impact · compliance narrative 에 유리.
37	Plug and Play	US/global; accelerator/seed	corporate innovation network, 60+ accelerator programs, many early-stage investments per year.	enterprise/corporate pilot-ready startups across verticals.	agri/food/biotech corporate pilot 연결에 좋음. 단, deep-tech validation 은 별도 필요.
38	Point Nine	Germany/global; seed/A	software-focused early-stage; AI-native software, B2B SaaS, marketplaces.	B2B SaaS, B2B marketplaces, efficient GTM software companies.	bio-compliance SaaS, bio-data API, RAG workflow tool 이면 가능. wet-lab platform 만으로는 약함.
39	Redpoint Ventures	US/global; seed-growth	visionary entrepreneurs creating new markets or redefining existing ones.	consumer/enterprise/platform technologies with market-creation potential.	'biological data infrastructure'라는 새 시장을 만들 수 있음을 증명해야 함.
40	Salesforce Ventures	US/global; enterprise/growth	enterprise cloud ecosystem, software solving large-market challenges.	B2B SaaS/cloud/AI companies that can plug into enterprise workflows.	생물학 지식관리/규제/CRM-like scientific operating layer 로 가면 fit.
41	Sequoia Capital	US/global; idea-IPO+	daring founders, legendary companies, long-term partnership from idea to IPO and beyond.	outlier companies with compounding leadership, exceptional founders, huge markets.	최종 타깃. category-defining clarity, traction, moat, regulatory trust 가 모두 필요.
42	SoftBank Vision Fund	Japan/global; growth	full-stack AI ecosystem: hardware, infrastructure, applications; scaled transformative tech.	late-stage AI/tech infrastructure companies with massive scale potential.	초기에는 부적합. scale metrics, infrastructure validation, global partner pipeline 이후 target.
43	Soma Capital	US/global; seed	deep founder relationships, brilliant teams pushing humanity forward, software/YC network.	software, AI, fintech, healthtech, consumer founders with fast networked growth.	YC-compatible wedge 와 founder velocity 가 있으면 early signal 로 좋음.
44	Spark Capital	US; seed-growth	products they love by creators they admire; sector-flexible, creator/product-led conviction.	exceptional products, consumer, media, frontier, software companies.	scientist/developer 가 사랑하는 bio tool 또는 데이터 제품이면 fit 상승.
45	SV Angel	US; seed	founder advocates, long-term support, Silicon Valley network.	founders as agents of positive change, early software/tech companies.	미국 네트워크 signal 용. 간단한 seed narrative 와 top-tier co-investor 가 중요.
46	Techstars	US/global; accelerator/pre-seed	3-month mentorship-driven accelerator, capital, global network.	coachable early startups ready for fast customer discovery and fundraising.	network/멘토/early validation 에는 좋지만 deep-tech 자본 · 검증은 별도 조달해야 함.
47	Tencent Investment	China/global; strategic/corporate VC	Tencent ecosystem: AI, cloud, fintech, advertising, gaming, consumer internet, healthcare expansion.	consumer/platform companies, China/Asia digital leverage, healthcare/AI ecosystem-adjacent firms.	AI-bio healthcare/agri 중국 적용 시 가능. IP/data sovereignty 와 cross-border compliance 가 핵심.
48	Thrive Capital	US; early-growth	internet, software, technology-enabled companies; concentrated founder partnerships; AI/software momentum.	product-led software, AI, fintech, healthcare tech, consumer platforms.	later target. bio-data moat 가 product-led software 처럼 보일 때 유리.

49	Tiger Global Management	US/global; growth/crossover	research-driven long-term investment in high-quality innovative companies across stages.	late-stage/high-growth internet, software, fintech, consumer, AI/tech leaders.	초기 target 아님. hypergrowth, predictable unit economics, global scale after product-market proof.
50	Y Combinator	US/global; accelerator/pre-seed	early-stage funding model, intense 3-month program, founder learning velocity, launch fast.	scalable startups with strong founder-market fit, fast iteration, clear user pain.	가장 현실적인 early legitimacy target. 첫 제품은 'make something people want' 수준으로 좁고 빠르게 검증해야 함.

3. Asperitas Fundraising Targeting - Cluster View

Cluster	VCs	Asperitas execution rule
Seed / Accelerator / Founder-Network	YC, Techstars, 500 Global, Plug and Play, Kima, First Round, Founder Collective, BoxGroup, Liquid2, SV Angel, FundersClub	목표: 빠른 신뢰 신호와 네트워크. 요구 조건: 매우 좁은 first product, 빠른 사용자 검증, low-burn milestone.
Deep Tech / AI-Bio / Frontier Science	Khosla, Lux, DCVC, GV, NEA, a16z Bio+Health, Founders Fund, 8VC, General Catalyst	목표: Asperitas 의 core thesis 와 가장 높은 fit. 요구 조건: proprietary data, reproducible DBTL, compliance gate, defensible IP story.
Enterprise Software / Data Infrastructure	Bessemer, Insight, Greylock, Accel, Lightspeed, Bain Capital Ventures, CRV, Index, Redpoint, Salesforce Ventures	목표: biology platform 을 software/data infrastructure 로 전환. 요구 조건: workflow adoption, API/SaaS revenue, enterprise buyer pain.
Growth / Crossover / Mega-scale	Coatue, Tiger Global, SoftBank Vision Fund, Goldman Sachs Growth, Thrive, Sequoia	목표: 후속 성장 라운드. 요구 조건: scale metrics, repeatable revenue, global expansion, institutional audit/compliance readiness.
China / Asia Strategic Expansion	HongShan, IDG Capital, Tencent Investment, GFC	목표: 중국/아시아 확장, healthcare/agri/consumer ecosystem. 요구 조건: IP firewall, data sovereignty, Nagoya/CITES/LMO compliance.

4. Devil's Advocate - VC 가 공격할 질문

Scalability: 생물다양성 access 가 데이터/모델/제품 매출로 반복 확장되는가, 아니면 사람·허가·수입 절차에 묶인 서비스인가?

Moat: 경쟁사가 돈으로 같은 생물자원·데이터·실험을 복제할 수 없는가? 독점 데이터, 샘플 provenance, assay 결과, IP, workflow lock-in 이 있는가?

Biosafety / Compliance: CITES, Nagoya Protocol, LMO, 생물안전, 생물보안, 개인정보/유전정보, 수출입/ABS audit trail 이 투자심사 수준으로 정리되어 있는가?

Proof: AI foundation model 이라는 말보다, 어떤 입력 데이터가 어떤 예측/설계 성능을 개선했고 어떤 wet-lab/DBTL evidence 로 검증되었는가?

Commercial Pull: 누가 돈을 내고, 어떤 예산을 대체하며, 얼마나 반복 지불하는가? buyer risk 를 얼마나 줄이는가?

5. Source Registry
